

Dear members of the environment committee my name is Mike g Papa. From Stamford ct . I SUPPORT BILL SB NO 366 to ban the use of POISONS on the fields listed above !

The (challenge we face today )is to gain the STEWARDSHIP skills we desperately need to manage our ecology in a way to benefit the health of people , plants and the environment . COHERENCE , COLLABORATION , CREATIVITY and hard work is the right strategy we all need to work for ! The use of pesticides in the last 70 years have contributed in pollution ,diseases and to the poor management skills we use today !!! We all need to take good care of our land , re-gain the lost skills OUR ANCESTORS USED , and defend the INTEGRITY OF NATURE for the health of future generation of people . I like to state that the managers on the municipal level taking care the fields Are all( selected good workers )but in many cases they do not have the opportunity to perform due to political climate they need to navigate every day! I ask to empower the municipal workers to focus on developing the stewardship skills , and allow them to experience the satisfaction of a job well done ! I would be glade to help if you find it appropriated .

Sincerely. Mike g Papa.
